🎓 EDUCATION

North China Electric Power University (NCEPU), Baoding, China   2016 – Present

B.S. in Network Engineering

⚙ IT SKILLS

- Major programming language : Golang
- Other programming language : java, C++
- Skilled use of MySQL and MongoDB, basic understanding of the use of CockroachDB
- Master basic Docker operations
- General understand Kubernetes design framework
- Skilled use of 🐧 Linux and macOS

👥 EXPERIENCE

Mall Management Background   2017.07.18 – 2017.08.14

 Project Site: https://github.com/TechCatsLab/ShopApi

Project Introduction:

It uses the echo framework, using MySQL and MongoDB, to achieve a complete mall management background.

My part of work in the project:

- I participated in the design of database and database reconstruction, understanded the design framework of the entire mall backstage.
- I designed and implemented a user address management system, an order trading system, and a partial code that restructured the user system.
- I participated in the entire shopping mall background test and the front end joint debugging test.

Go Crawler, Baoding, China   Start Time – End Time

Maintainer   Golang
